Abstract

An abstract describing what the prospectus is all about. “Omit needless words” [1]: It should fit within the page without making the footer of the title page break the page — otherwise what kind of abstract would it be?

5.1 Compilation issues

If you are not familiar with Tex, I advise you to download TexShop for Mac OS.

To include the references and display them in the final pdf, you have first to typeset this file with *LaTeX* (ComboBox upper left, if you use TexShop), then with *BibTeX* and finally again with *LaTeX*.

In order to resolve figures/table/... references you have to run 2 times the (latex) typeset.

5.2 Document structure

Some basic sections:

- Introduction (including Motivation)
- State of the Art
- Project requirements and analysis
- Project design (top-down)
- Implementation issues (bottom-up)
- Tests (methodology, results, comments)
- Conclusions and future work or possible developments

5.3 Some examples

Figure 1 shows how to insert figures in the document.

Figure 1. Caption of the figure

Table 1 shows how to insert tables in the document.

Col 1	Col 2	Col 3	Col 4
1	2	3	Goofy
4	5	6	Mickey

Table 1. Caption of the table
